SWISS DESIGN SINCE 1998

Selina little — pocket-size hygrometer!

Smiley shows whether the air humidity is optimal

Retractable foot or wall-mounting

Pocket-size (only 47 mm wide and high)

Is it dry, humid, hot or cold? Selina little provides the answer at a glance. This little hygrometer lady is not only nice to look at, she also tells you what to do with your indoor climate. If Selina little shows you a nice smile, then your room's humidity is fine.

Selina little's unhappy face means you should do something about your indoor air. If the humidity level is below 40 %, increase it with a humidifier. A humidity level above 60 % should be decreased to an optimal level using a dehumidifier.

Equipped with a sticker for wall-mounting and a little retractable foot, you can fit Selina little just anywhere you want. This mini hygrometer even fits into any travel bag thanks to her small size — meaning you can also keep an eye on the room climate when traveling.
